FEATURED PROJECTS

Latt — Subscription Manager

UX • PRODUCT • DEV

Designed a subscription manager prioritizing transparency over automation to reduce user payment anxiety.

- Conducted comparative analysis of 15 subscription products.
- Applied heuristic evaluation to isolate clear trust issues.
- Designed an intuitive manual-entry onboarding prototype.

Tools: HTML, CSS, JavaScript, Figma

Duolingo Behavioral UX Analysis

UX RESEARCH

Identified core behavioral friction mechanics affecting long-term language learner retention loops.

- Synthesized academic literature, community discussions, and reviews.
- Mapped key drop-off vectors in vocabulary learning paths.
- Proposed contextual vocabulary changes to mitigate heavy cognitive load.

Tools: Figma, Miro, Notion

Aporia — AI Logic Interface

PRODUCT DESIGN

Designed an AI user interface pattern that prompts objective critical reasoning over user agreement.

- Explored argument mapping systems, epistemic neutrality, and clear interaction trees.
- Built high-fidelity UI layout variations and interactive prototype core testing flows.

Tools: Figma, FigJam, UX Research.

INDEPENDENT PROJECTS

Freelance Designer & Developer

2023 – Present

Engineered cross-functional academic and personal client web apps utilizing front-end stacks and prototyping tools.

- Designed, tested, and implemented semantic responsive user-centered interface views.
- Collaborated directly with structural peers to mitigate technical code block errors.
